

Transporto uždavinys

Išspręskite transporto uždavinį bent 2 būdais:

- Simplekso metodu.
- Surandant apribojimų aibės kraštutinius taškus ir išrenkant iš jų sprendinius.
Jei sprendinys nėra vienintelis, tai šiuo metodu rasite visus sprendinius.
- Šiaurės vakarų kampo metodu.
- Potencialų metodu.
- Savo kitu koku nors savo pasirinktu metodu ir programine įranga.

Ar sprendinys yra vienintelis? Jei sprendinys ne vienintelis, tai raskite visus sprendinius.
